

NEWSLETTER – SUMMER 2003

MTOOL Ltd (formerly known as Mould Teknik Tools Ltd) is a well-known manufacturer of plastic injection, compression and transfer mould tools, with a deserved reputation for quality, short lead-times and competitive pricing.

Directors, Gary Smith and Neil Richardson, believe that the next 12 months will be amongst some of the most exciting of their working lives. Demand for the Company's products and services mean that it is about to embark upon an ambitious expansion and development programme.

Amongst the many projects and activities being undertaken are:

- **Re-brand to MTOOL**
The new name heralds a new era, is shorter and facilitates communication.
- **Expansion**
The Company has secured the adjoining premises. This means the square footage of the premises has increased from 3,000ft² to 8,200ft².
- **Plant & Equipment**
The Company is about to undertake an ambitious capital expenditure programme. The latest *AGIE Advance* machine will be purchased in September 2003, closely followed by a *Roders RP800* high-speed milling machine in November 2003.

These pieces of plant will enable the Company to further reduce lead-times and facilitate customer service

The new equipment will complement the recently installed *Roders 600P* high-speed milling machine, with its integrated 16-pallet automated work cell.

ISO 9001: 2000. This will formalise the Company's excellent Quality & Management systems. It is planned to achieve registration in the first quarter of 2004.

If you would like to find out more about the new **MTOOL** or talk about our production operation, call Gary or Neil on the number below.

Pre-arranged visits are welcome.

Our new brochure will be available in the near future.
